

Contents

Letters to the Editor

- The strength of NIII-CIII complex emission in low-mass X-ray binaries as a possible indicator of metallicity
Moche, C., Pakull, M.W. L1

- Photometry of AS 296 in outbursts: a puzzling color evolution
Munari, U., Buson, L.M., Massone, G. L5

Cosmology

- (RN) Possible gravitational amplification in the binary pulsar 1957+20
Schneider, J. 1

Extragalactic astronomy

- Gravitational micro-lensing due to an ensemble of compact objects with different masses
Kayser, R., Weiss, A., Refsdal, S., Schneider, P. 4

- Synchrotron emission spectra from shockwaves in active galactic nuclei: an energy and space dependent diffusion coefficient
Fritz, K.D. 14

- (RN) Millimeter continuum observations of the active star-forming core of M82
Thronson, H.A., Jr., Walker, C.K., Walker, C.E., Maloney, P. 29

- Neutral hydrogen observations of the irregular galaxy IC 10
Shostak, G.S., Skillman, E.D. 33

- The statistical properties of gravitational lenses of galaxies and quasars
Xiangping Wu 43

- Observable parameters of spiral galaxies and galactic magnetic fields
Starchenko, S.V., Shukurov, A.M. 47

- The peculiar kinematics of the elliptical dust-lane galaxy NGC 4589
Möllenhoff, C., Bender, R. 61

- Distribution and luminosity function of OB stars in M31
Berkhuijsen, E.M., Humphreys, R.M. 68

- (RN) The influence of relativistic kinematics on the asymmetry of spectral line profiles and the observed asymmetries in AGN's
Mediavilla, E., Inertis, F.M. 79

- Erratum: The H_I-properties of bright southern galaxies*
Becker, R., Mebold, U., Reif, K., van Woerden, H. 402

Galactic structure and dynamics

- Liouville's equation. II. Eigenmodes of harmonic potentials
Sobouti, Y. 83

- Liouville's equation. III. Symmetries of the linearized equation
Sobouti, Y., Samimi, J. 92

- Asymmetrical barred galaxies
Colin, J., Athanassoula, E. 99

Stellar clusters and associations

- Studies of dynamical properties of globular clusters. V. Implications of the observed flat MS mass function in 47 Tucanae
Meylan, G. 106

- The X-ray source in the core of 47 Tucanae
Aurière, M., Koch-Miramond, L., Ortolani, S. 113

Formation, structure and evolution of stars

- A photometric study of F-type stars of high galactic latitude
Arellano Ferro, A., Giridhar, S., Chavez, M., Parrao, L. 123

- Photographic and spectroscopic observations of three type Ia supernovae: 1982W, 1983R, and 1983U
Barbon, R., Ciatti, F., Iijima, T., Rosino, L. 131

- Near-infrared survey of IRAS sources with colours like planetary nebulae
Manchado, A., Pottasch, S.R., García-Lario, P., Esteban, C., Mampaso, A. 139

- Constraints on the optical counterpart of GBS 0526-66
Boer, M., Hurley, K., Gottardi, M., Moche, C., Pedersen, H., Simonsen, R.L. 148

- Effects of stellar rotation on the Geneva photometric system
Hauck, B., Slettebak, A. 153

- Carbon abundance in the primaries of six Algol-type stars
Cugier, H. 168

- Soft X-ray observations of the Vela pulsar PSR 0833-45
Ögelmann, H., Zimmermann, H.-U. 179

Evolution of close binary systems that undergo a dynamically stable late case C mass transfer

Pastetter, L., Ritter, H. 186

The X-ray ephemeris of Cygnus X-3

van der Klis, M., Bonnet-Bidaud, J.M. 203

Multiple close frequencies of the Delta Scuti star θ^2 Tauri.

II. The second multisite campaign

Breger, M., Garrido, R., Huang Lin, Jiang Shi-yang,
Guo Zi-he, Frueh, M., Paparo, M. 209

Stellar atmospheres

Investigation of micro-flaring and secular and quasi-periodic variations in the dMe flare stars. II. "Time signatures" of micro-variability in V 1285 Aquilae, V 645 Centauri, V 1054 Ophiuchi and AU Microscopii

Andrews, A.D. 220

Rotational modulation and flares on RS Canum Venaticorum and BY Draconis stars. XII. Near-to-simultaneous high resolution UV and optical observations of II Pegasi during July 1984

Byrne, P.B., Panagi, P., Doyle, J.G.,
Englebrecht, C.A., McMahan, R., Marang, F.,
Wegner, G. 227

Oxygen in old and thick disk stars

Barbuy, B., Erdelyi-Mendes, M. 239

An abundance analysis of the Hyades giant γ Tauri: an exercise in caution

Griffin, R.E.M., Holweber, H. 249

An estimate of the total chromospheric, transition region and coronal radiative losses in late-type stars

Doyle, J.G. 258

Observations of modulation and phase displacement of the stellar wind in six red giant spectroscopic binaries

Reimers, D., Schröder, K.-P. 261

Excitation of HCN hyperfine lines in circumstellar envelopes: redshift and molecular abundance

Truong-Bach, Nguyen-Q-Rieu 267

Polarization characteristics of galactic B[e] stars

Zickgraf, F.-J., Schulte-Ladbeck, R.E. 274

Long-term and mid-term spectroscopic variations of the Be-shell star HD 184279 (V 1294 Aquilae). II. Towards a model

Ballereau, D., Chauville, J. 285

Search for cool giant companions of the Be stars ζ Tauri and KX Andromedae

Floquet, M., Hubert, A.M., Maillard, J.P.,
Chauville, J., Chatzichristou, H. 295

Diffuse matter in space (including HII regions and planetary nebulae)

(RN) Elemental depletions in single interstellar clouds

Niedzielski, A., Krelowski, J. 304

Infrared spectroscopy of supernova remnants

Oliva, E., Moorwood, A.F.M., Danziger, I.J. 307

The distribution of hot thermal methanol in Orion-KL

Wilson, T.L., Johnston, K.J., Henkel, C.,
Menten, K.M. 321

Potential of grains in astrophysical media: influence of the surface state (porosity)

Millet, J., Lafon, J.-P.J., Gonin, J.C. 327

(RN) CN 1-1: a bipolar type I planetary nebula

Bhatt, H.C. 331

Strong magnetic fields in interstellar H₂O maser clumps

Fiebig, D., Güsten, R. 333

The relative importance of collisional and chemical pumping and radiative transfer effects in cosmic OH sources

Piehler, G., Kegel, W.H. 339

The gas-to-dust ratio and the molecular hydrogen content in galactic cirrus clouds

Heithausen, A., Mebold, U. 347

High resolution spectroscopy of the planetary nebula Hubble 12

Miranda, L.F., Solf, J. 353

The Sun

A twisted flux model for solar prominences. II. Formation of a dip in a magnetic structure before the formation of a solar prominence

Démoulin, P., Priest, E.R. 360

Energy storage in solar loops by footpoint motions

Zappalà, R.A., Zuccarello, F. 369

The solar system

CN-shell structures and dynamics of the nucleus of comet P/Halley

Schulz, R., Schlosser, W. 375

(RN) Polarimetry of comet Bradfield (1987s)

Kikuchi, S., Mikami, Y., Mukai, T., Mukai, S. 386

(RN) Rotational variations in the optical polarization of 4 Vesta

Brogia, P., Manara, A. 389

Relations involving the spherical albedo and other photometric quantities of planets with thick atmospheres

Hovenier, J.W., Hage, J.I. 391

Celestial mechanics and astrometry

Fundamental frequencies and small divisors in the orbits of the outer planets

Nobili, A.M., Milani, A., Carpino, M. 313*

* This paper by Nobili et al. is not to be found in this issue but in Vol. 210 No. 1/2 (February 1, 1989) where it was erroneously placed in Section 8 ("Diffuse matter in space") instead of Section 11 ("Celestial mechanics"). The title is listed again here in order to draw the reader's attention to this error and to obviate any difficulties in locating this paper.
